

Get Married  
Cinematography

# Cinematography

Wedding cinematography is completely different from the traditional style of wedding videos. It replaces traditions and focuses mainly on emotions, which are being shown in a unique and unforgettable way in the short film. Our goal is to capture the most important moments of the day, and we think some intimate, emotional momentums are able to showcase the wedding a lot more than a long, unedited video.

We pick the best shots, speeches from your wedding with great caution, out of which we make a short film with the feel of a motion picture. Our creative filming, perfectly harmonizing choice of music and editing will all create for sure and unforgettable memory for you.
